

CORPORATE PROFILE · MMXXVI

WESTAR

Strategic capital. Transformative
technology.
Lasting value across generations.

We back what the world will *depend on* tomorrow.

Westar puts strategic capital and decades of cross-border experience behind ventures that change how people live, how markets move and how intelligent machines are governed.

CAPITAL

Private strategic capital, deployed with institutional discipline.

INTELLIGENCE

Governance infrastructure for the next era of AI, through RAD.

LONGEVITY

Platforms that bring together biotechnology, cellular wellness and intelligent care.

Innovating with *purpose*. Executing with *precision*.

Westar is a strategic investor and advisory principal working where capital, technology and international enterprise meet.

We find structural opportunities where traditional frameworks fall short, then build the coalitions needed to act on them. We bring together private capital, tangible assets and cross-border enterprise development, and we hold strategic positions in the technologies that will shape the decades ahead.

We offer alignment, not just access. We work directly with family offices, institutional principals and international consortiums, and we back every initiative with experienced legal counsel and institutional accounting standards.

OUR COMMITMENT

Integrity at every stage of execution, from first conversation to final settlement.

01

ALIGNMENT

Partners who share our vision, our standards and our time horizon.

02

DISCIPLINE

Independent counsel and institutional accounting on every engagement.

03

ENDURANCE

Value built to last for generations, not for a single transaction.

“True leadership is not measured by the scale of a single transaction. It is defined by the endurance of a vision capable of transforming industries, bridging international markets, and building lasting value across generations.”

For decades, my work has sat at the meeting point of private strategic capital, tangible assets and cross-border enterprise. Across that time, one lesson has held: the opportunities that matter most are usually found where conventional frameworks stop working.

Westar exists to find those opportunities, and to bring together the partners, capital and expertise needed to act on them with precision.

Today that work reaches into the frontiers that will define the coming generation: governance infrastructure for advanced AI through RAD, and longevity platforms that join biotechnology with intelligent systems.

Our promise to every partner is the same as it has always been: alignment, discipline and integrity at every stage. I look forward to building what comes next with you.

Burl R. Sheppard

BURL R. SHEPPARD

FOUNDER & CHIEF EXECUTIVE OFFICER · WESTAR DEVELOPMENT CORPORATION

Where we put our *capital and conviction*.

01

AI Governance

FLAGSHIP VENTURE · RAD

Strategic equity and advisory leadership in Rad Laboratories, which is building constitutional governance infrastructure so that high-consequence AI acts only with meaning, authority and evidence.

02

Longevity & Biotechnology

FLAGSHIP VENTURE · LONGEVITY CLINICS

Backing platforms that connect advanced biotechnology, cellular wellness and intelligent systems, so people can live longer, healthier and more capable lives.

03

Fintech Platforms

TRADING · CROSS-BORDER PAYMENTS

Proprietary trading-platform and cross-border payment technology that makes international commerce faster, simpler and more secure.

04

Strategic Partnerships

ADVISORY · CAPITAL ALIGNMENT

Long-term alliances with companies, institutions and principals worldwide, structured with care and built to endure.

Governing intelligence, *not just powering it.*

Most AI guardrails filter what a model says. RAD governs what a machine is authorised to *do*: before, during and after every action.

Rad Laboratories is developing cognitive infrastructure that coordinates advanced AI with human reasoning, built on a constitutional governance framework for high-consequence systems. Its emphasis is on coherence and accountability over raw computational scale.

Westar is a strategic investor and advisory principal in the venture. We lead its cross-border positioning, institutional partnership structures and capital alignment, working with international legal counsel to build scalable equity partnerships and technology-licensing frameworks.

144	11M+	3,200+	37
PROVISIONAL PATENT ARCHITECTURES	LINES OF SYSTEMS ARCHITECTURE CODE	SYSTEM SIMULATIONS CONDUCTED	CURATED SAFETY DATASETS

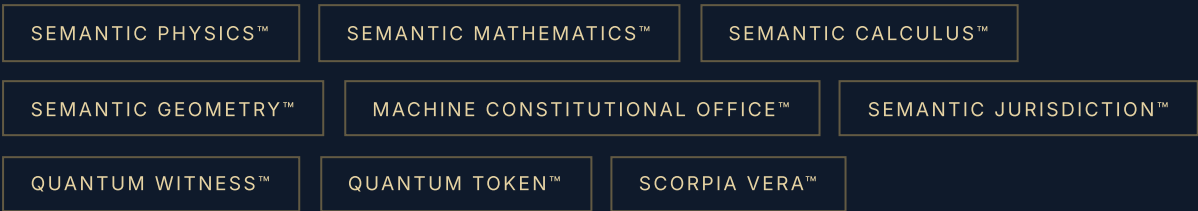

ARCHITECTURE Luxherion Hive™ A distributed AI-coordination architecture that combines distributed intelligence networks, verification layers and hybrid quantum-logic simulation.	ENVIRONMENT RAD Apparatus A platform for exploring how people and AI systems interact, reason and decide together.	ALIGNMENT Guardian Frameworks Human-centred alignment approaches that keep final authority with people, not machines.
--	---	--

Development figures as published by Rad Laboratories. Active development in Vancouver, British Columbia.

Five principles govern every machine action.

I	II	III	IV	V
Meaning before action	Legitimacy before permission	Evidence before reliance	Purpose before optimisation	Witness before trust
Every action is understood as a meaningful event before it is carried out or recommended.	Actions must be lawful, within mandate and human-authorised before they proceed.	Provenance, lineage and reviewable proof are kept at every step.	Systems optimise only within mission, safety, dignity and lawful authority.	Every consequential action leaves an audit-ready record.

THE GOVERNANCE STACK: INTERLOCKING LAYERS, NOT A SINGLE FILTER

BUILT FOR ENVIRONMENTS WHERE ACTIONS HAVE CONSEQUENCES

AEROSPACE & SECURE INFRASTRUCTURE Event interpretation, witness-bound trust and audit-ready behaviour for high-consequence networks.	ROBOTICS & AUTONOMOUS SYSTEMS Governed action, human override, force and proximity limits, and refusal states.
CAPITAL MARKETS Permissioned capital movement, fraud detection, revocable authority and mandate-bound settlement.	GOVERNMENT & PUBLIC INSTITUTIONS Legal mandate, public accountability, preserved evidence and full audit trails.

Protect the architecture. Govern the machine. Witness the action. Preserve the human.

Adding years to life, and *life to years*.

Westar backs longevity platforms that bring together advanced biotechnology, cellular wellness and intelligent systems in a new standard of personalised, proactive care.

Health is the most valuable asset any of us will ever hold. Longevity medicine moves care away from reacting to illness and toward understanding, measuring and maintaining health over a whole lifetime. Westar's role is to supply the capital, partnerships and cross-border reach that let the best of this science grow responsibly, carried out in partnership with licensed medical professionals.

PILLAR I

Advanced Biotechnology

Supporting platforms that turn the latest life-sciences research into practical, measurable programmes.

- Advanced diagnostics
- Biomarker assessment
- Research partnerships

PILLAR II

Cellular Wellness

Care models built on understanding health at its foundation and maintaining it over time.

- Personalised programmes
- Preventive focus
- Ongoing monitoring

PILLAR III

Intelligent Systems

Bringing data and AI into care, governed by the same principles of evidence and human authority that guide RAD.

- Data-informed insight
- Governed AI support
- Clinician-led decisions

Where RAD governs intelligent machines, Longevity Clinics apply intelligent systems to human wellbeing. Together they reflect one conviction: *technology should serve and preserve the human.*

Alignment first. *Then execution.*

We look for partners who share our global vision and our standards. Every engagement follows a disciplined path, so each party knows where it stands at every stage.

01

INTRODUCTION

A direct conversation between principals about objectives, timelines and fit.

02

DILIGENCE

Thorough, documented review on both sides before any commitment.

03

STRUCTURING

Terms built with independent legal counsel and institutional accounting standards.

04

EXECUTION

Transparent delivery and reporting, with accountability at every milestone.

WHO WE WORK WITH

Family offices, institutional principals, international consortiums, technology founders and life-sciences innovators.

WHAT WE BRING

Strategic capital, cross-border positioning, partnership structuring and capital alignment, with integrity throughout.
